I am 52 years old and am a Certified Hypnotherapist at the Weleda Pharmacy in Fourways.

On Easter Friday I had an accident with my microlight aircraft that left me with a broken wrist. I fractured the Radius and Ulna in my left arm and sustained multiple fractures of the wrist joint.

My Orthopaedic Surgeon fitted a Radius Fixator and I've been undergoing Physiotherapy since then. The arm and hand were painfully swollen and immobile and I developed a Frozen Shoulder, presumably as a result of the trauma to the arm.

Some weeks ago your company set up a display of your product outside the door of my rooms inside the pharmacy. A fortnight ago I picked up one of the brochures on the stand and read that the magnets were claimed to be effective for Sports Injuries and Frozen Shoulders.

I, with some scepticism, decided to buy your wristband magnet and to try it out.

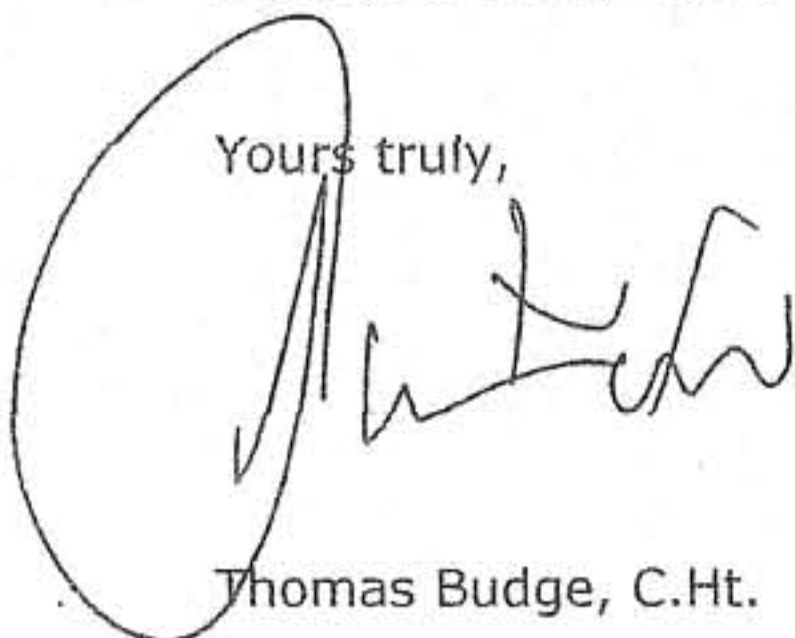

Within seventy-two hours the pain in my shoulder had almost gone; the swelling of my hand had subsided noticeably; and I had greater flexibility of my wrist and fingers. The prognosis on the frozen shoulder was that it could take up to two years to pass and that my hand and wrist would recover over much the same period.

My physiotherapist was astounded at the progress that I had made in just one week.

I spent last weekend in my garden removing a large creeper that had overtaken a tree. I had no difficulty in performing this task and attribute this remarkable recovery to the Bioflow magnet I now wear on my arm.

I can personally vouch that this product does what it claims to do.

Yours truly,

Thomas Budge, C.Ht.
